THE INNOVATORS OF COMFORT™

AWARD FOR DESIGN EXCELLENCE
NORWEGIAN DESIGN COUNCIL

SMOOTH, SENSUAL, SEDUCTIVE

It's Stressless® Jazz. A harmonious fusion of function and comfort we've spent 35 years refining. The contemporary interpretation of the rounded base and sleek steel frame pay tribute to a true classic: the original Stressless® recliner from 1971. May your relationship with Jazz last just as long.

CLASSIC COMFORT, MODERN STYLE

With its simple, elegant lines, smooth surfaces and stainless steel curves, Stressless® Jazz sits comfortably in the most contemporary of living spaces. Just as you will when you settle down, lean back, put your feet up on the footstool and let the neck and back support automatically adjust to the position of your body.

DESIGNED FOR COMFORT

Inspired by the harmonious flow of free-style music, our designers have created a new kind of recliner in Stressless® Jazz; a recliner that's comfortably in tune with your mood of relaxation. And with its effortless blend of smooth lines and textures, it'll strike just the right visual note too. So sit back, free your mind, relax your body and start living in a Stressless® Jazz.

The patented Stressless® Plus™ system automatically adjusts the ergonomic headrest and lumbar support as you recline – for maximum comfort while reading, watching TV and resting.

Even when fully reclined, the angle of the headrest can be adjusted. And with one simple movement you can activate the sleep function and lay it completely flat.

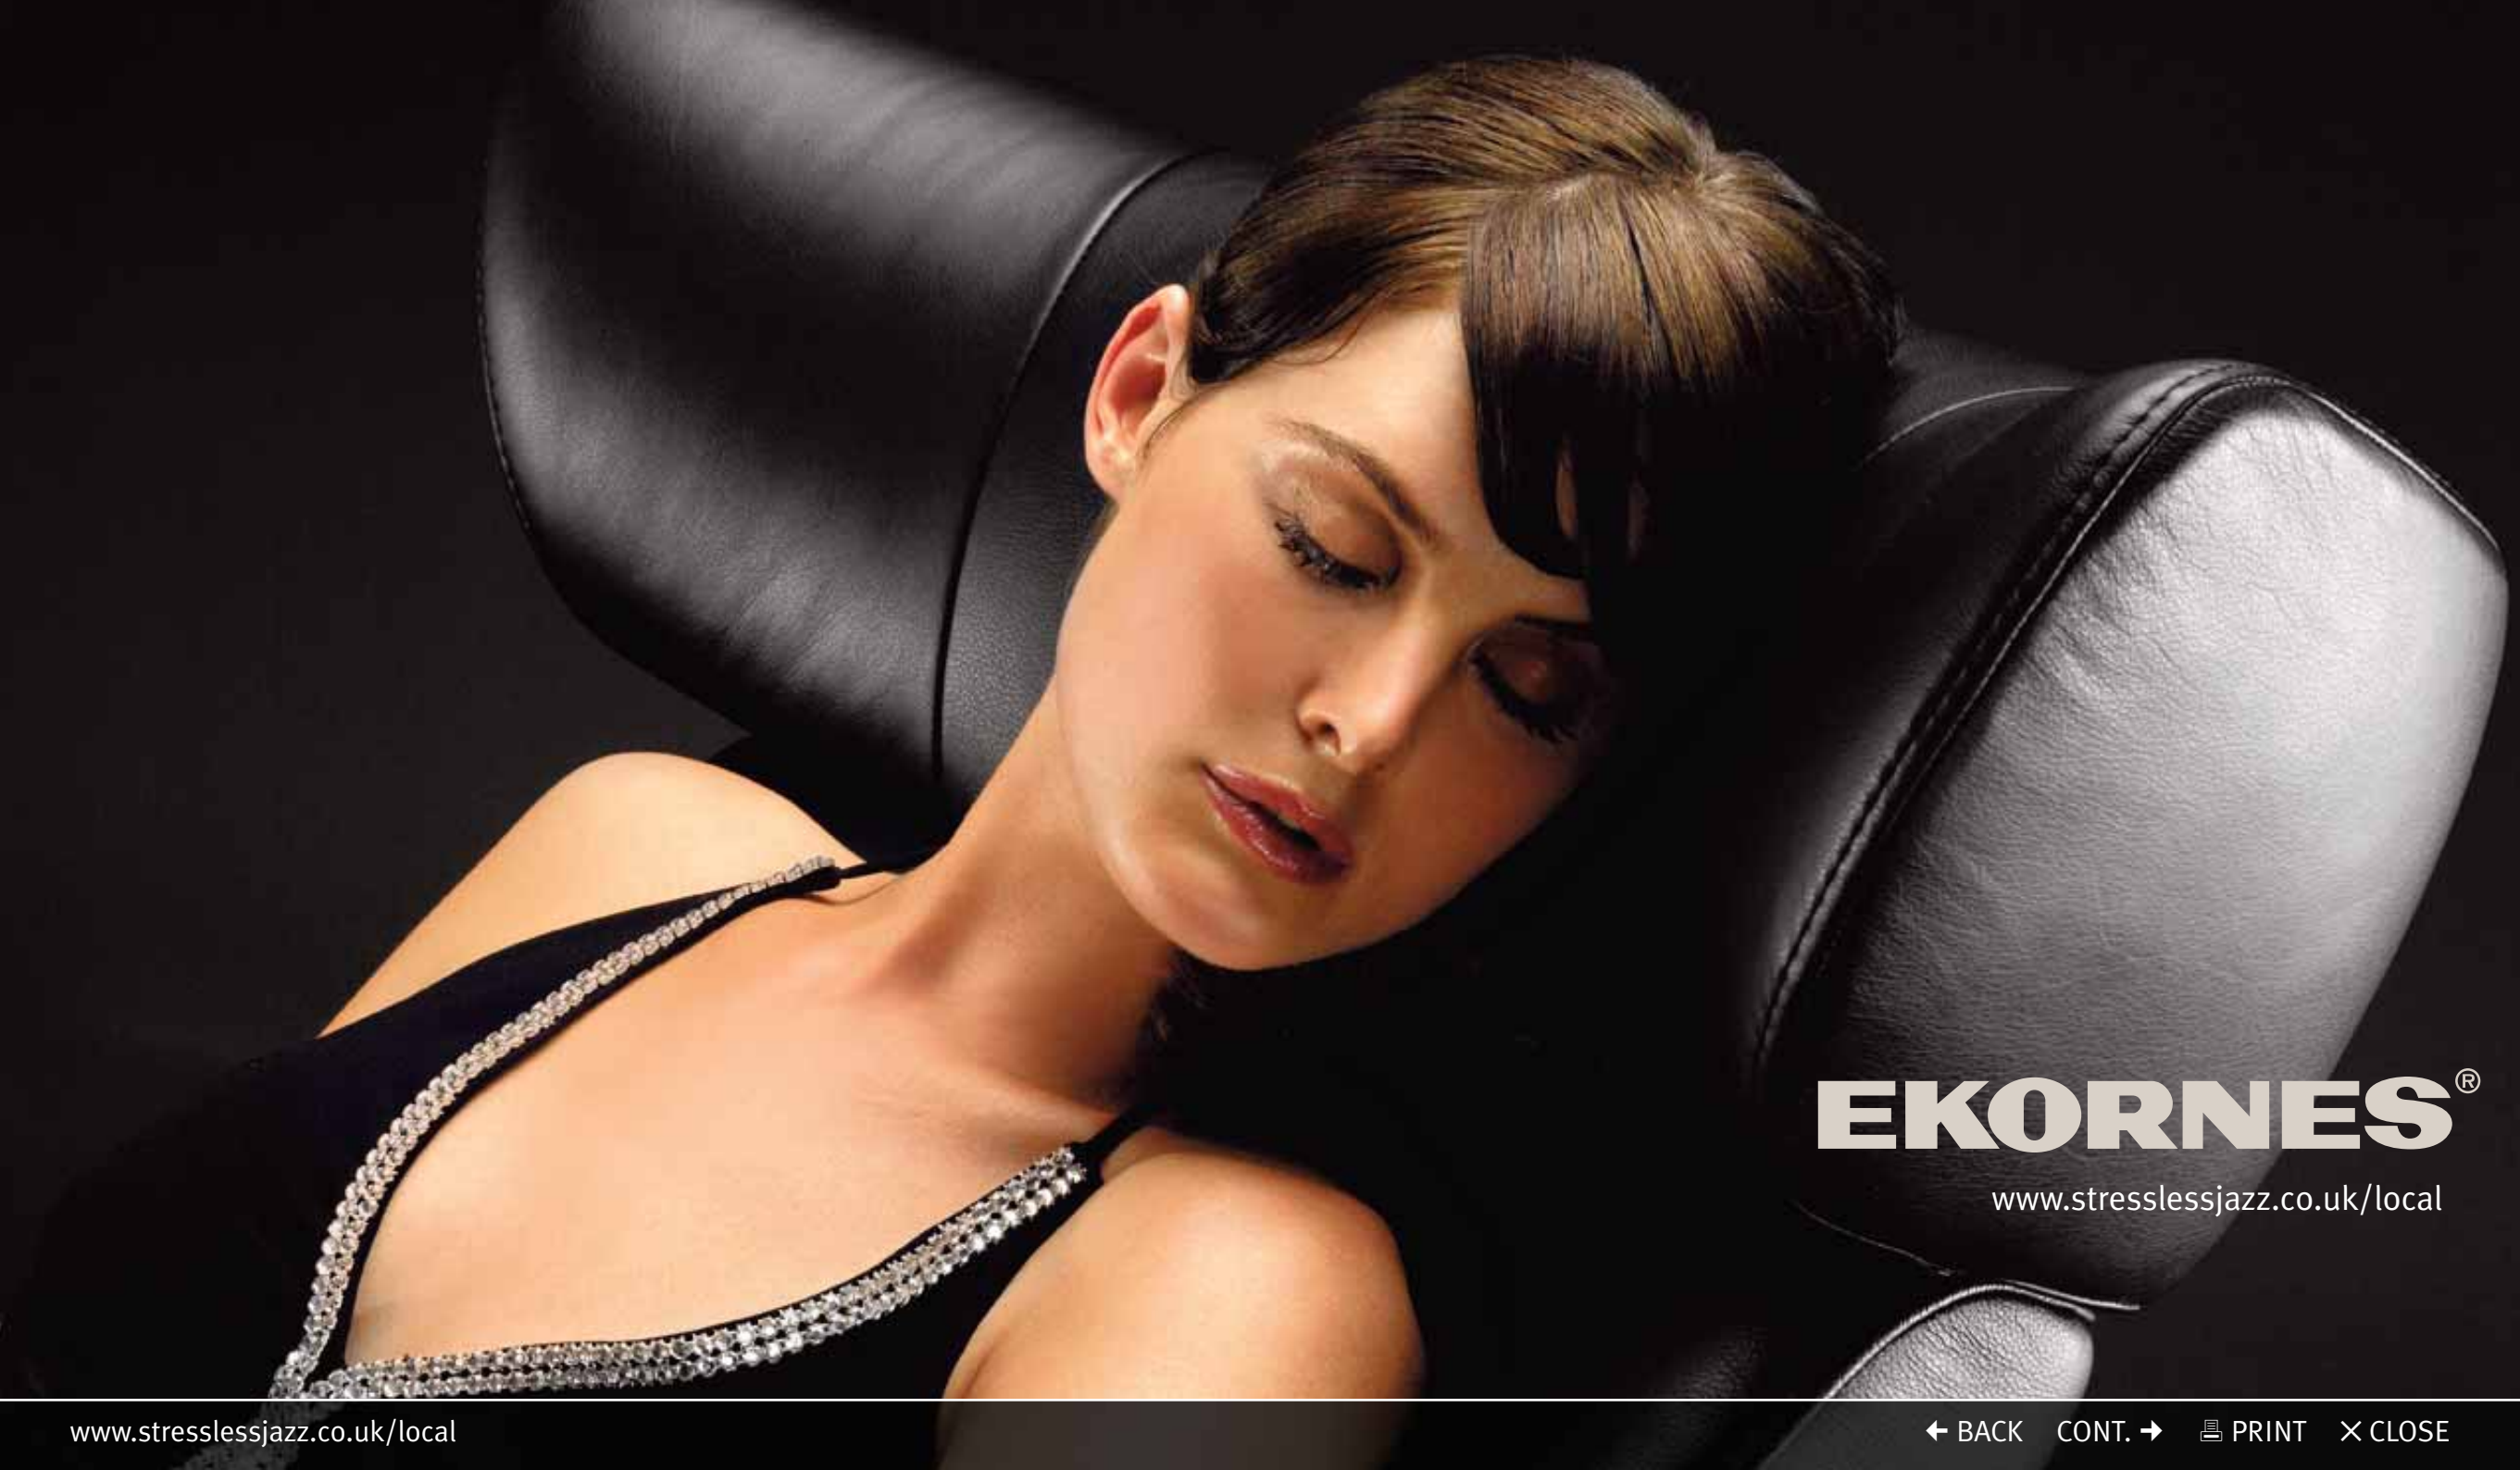

The Stressless® Jazz and its footstool can be adjusted to match your own height. Simply select one, two or three rings for the perfect fit.

The Stressless® footstool is free-standing to fit all leg lengths and thanks to its built-in glide function, the top follows your body's slightest movements.
